About Non-GAAP Financial Measures

To supplement Fang's consolidated financial results presented in accordance with United States Generally Accepted Accounting Principles ("GAAP"), Fang uses in this press release the following measures defined as non-GAAP financial measures by the United States Securities and Exchange Commission: (1) non-GAAP operating (loss)/income, (2) non-GAAP net (loss)/income and (3) non-GAAP basic and diluted (loss)/earnings per ordinary share and per ADS (4) adjusted EBITDA. The presentation of the non-GAAP financial information is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. For more information on these non-GAAP financial measures, please see the table captioned "Reconciliation of GAAP and non-GAAP Results" set forth at the end of this press release.

Fang believes that these non-GAAP measures help identify underlying trends in Fang's business that could otherwise be distorted by the effect of the change in fair value of equity securities, and the expenses and gains that Fang includes in income from operations and net income. Fang believes that these non-GAAP measures provide useful information about its operating results, enhance the overall understanding of its past performance and future prospects and allow for greater visibility with respect to key metrics used by Fang's management in its financial and operational decision-making. A limitation of using these non-GAAP financial measures is that share-based compensation, investment income, change in fair value of equity securities, interest income and expenses, income tax expenses, and depreciation expenses have been and will continue to be a significant recurring item that will continue to exist in Fang's business for the foreseeable future. Management compensates for these limitations by providing specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables have more details on the reconciliation between non-GAAP financial measures and their most directly comparable GAAP financial measures.

New accounting pronouncements

The new revenue recognition standard (ASU No. 2014-09 'Revenue from Contracts with Customers') was released in 2014 and becomes effective for Fang with effect from January 1, 2018. Fang has elected to adopt the new standard (ASC 606 - 'Revenue from Contracts with Customers') using cumulative effect method for all contracts that are not completed contracts at the date of initial application. Under this transition method, the new standard is applied from January 1, 2018 without restatement of comparative period amounts. The cumulative effect of initially applying the new standard is reflected as an adjustment to opening retained earnings as of January 1, 2018 in the amount of \$0.3 million.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, which is an amendment which addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This guidance includes the requirement that equity investments that do not result in consolidation and are not accounted for under the equity method be measured at fair value with changes in the fair value recognized in net income. An entity may choose to measure equity investments that do not have readily determinable fair values at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment. Fang adopted this standard from the quarter beginning January 1, 2018, and Fang recognized a cumulative-effect adjustment to retained earnings of \$163.8 million as of January 1, 2018 for the after-tax unrealized gains of available-for-sale equity securities previously recognized in accumulated other comprehensive income.
